

ITEC 2016 Press Release

OLMOS Technologies GmbH is a system integrator supplying the Automobile, Aerospace and Defence Industry with Graphics Clusters, Servers and Workstations for over 20 years.

OLMOS is servicing existing simulation environments for their military customers all across Europe. Our specialisation in Multi Vendor Maintenance, Repairs, Training, supply of Obsolete Parts and Onsite Service is a great benefit for them.

At ITEC 2016 in London OLMOS Technologies GmbH is presenting its Projection Systems division with its camera and laser based multi-projector auto-alignment capabilities.

We deliver seamless projections for immersive simulations.

Our system provides a One-click-Autocalibration feature for the early morning readiness of your simulator.

We support huge installations with plus 30 projectors.

Any geometry is possible: dome, cylinder, sphere, free form screens.

4 integration variants:

1. OpenGL Plug-In into the IG Software i.e. Prepar3D, X-Plane, PhiloSim
2. Desktop Warping for huge number of Windows programs via nVidia Mosaic or AMD Display Output Post-Processing (DOPP)
3. Hardware Warping boxes
4. Projector built-in warping engines i.e. Christie Twist, DigitalProjection Warping
